HDCVI 2023

With the mission of "Enabling a safer society and smarter living", Dahua has been continuously active in providing more opportunities to customers as well as improving its services with innovations and technological advancements.

Ten years is a milestone. The Dahua HDCVI 2023 is starting a new decade. Adhering to the concept of "See clearer, Go smarter", HDCVI will continue to lead customers to explore a better future.

HDCVI 2023

See Clearer, Go Smarter

Focus on Human and Vehicle

WizSense

Launched by Dahua Technology, WizSense is a series of wide range AI products and solutions that adopt independent AI chip and deep learning algorithm. It can recognize human and vehicle in an image with high accuracy, enabling users to focus on real targets. Based on Dahua's advanced technology, WizSense makes your video intelligent, simple and inclusive.

Intelligent refers to WizSense powered by AI chip and deep learning algorithm. It provides various features that realize accurate alarms for human and vehicle, as well as quick target search, maximizing resources to increase overall efficiency.

Simple means WizSense offers simple configuration, especially for SMD Plus and AI Coding enabled by default. It eases your customer's daily job and also empowers them to make better business decisions.

Inclusivity of WizSense is the idea that everyone gets the opportunities and benefits from AI. With affordable prices and easy configuration of Dahua WizSense, AI is no longer confined to the ivory tower, but applied to real scenarios instead.

Full-color

The Full-color camera provides 24/7 color images with vivid color details that can accurately identify people or objects in low light conditions. Its latest upgrade, Full-color 2.0, has adopted a new packaging design with lively and eye-catching color palette. This new series offers enhanced image performance powered by WDR, 3DNR and Super Adapt technologies, providing users with a better visual experience.

High Performance Chipset

Provides high color reproduction and excellent low light performance for a more vivid and brighter image.

24/7 Color Monitoring

Increases probability of collecting valid human, vehicle, and event evidence.

Smart White Light

Serves as supplementary light to guarantee image usability even in total darkness.

Wide Application

Suitable for low-light environment, such as parking lots, streets, cinemas, shops, schools, etc.

Full-color Camera

Colorful View Ever, Dark World Never

Smart Dual Light

Flexible light switching,
Multiple scenes covering

Smart Dual Light

- Industry-leading smart dual illuminators technology expands the application scenarios of Full-color products.
- Switches between white light mode and IR mode according to the target detection status, effectively reducing light pollution.
- Works with Perimeter Protection/SMD Plus of AI XVR, accurately detecting real target and filtering out false alarms.
- Full-color monitoring in white light mode effectively captures vivid color information and clear details of human/vehicle targets.
- One-tap switching of various illumination modes through the DMSS App, allowing users to enjoy flexible configuration.

Multiple Illumination modes

Remotely manage camera illumination mode through XVR & DMSS APP.

Accurate Detection

Provides faster, more accurate, and longer-range motion detection.

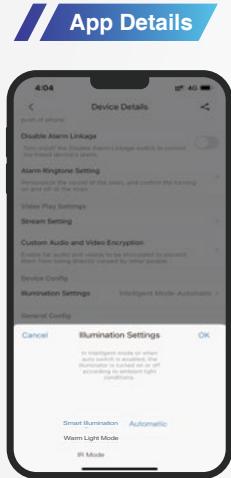

Illumination by Schedule

Improves the configuration efficiency and suits for more scenario applications.

Smart Dual Light

Mobile App: Remotely manage camera illumination anywhere, anytime

SMD Plus

One major problem with traditional motion detection is the false alarm triggered by non-target objects, such as pets, insects, leaves, branches, raindrops, lights, etc. Dealing with messages reporting false alarms is not only annoying but also a huge waste of time and money. In addition, due to lengthy surveillance videos, it usually takes a significant amount of time and effort to find relevant clips that contain crucial information. As an improved version of a typical Smart Motion Detection, SMD Plus is equipped with built-in independent AI intelligent chip that reduces false alarms and surveillance costs. At the same time, it also features practical functions empowered by deep learning AI algorithms.

SMD Plus Work Process

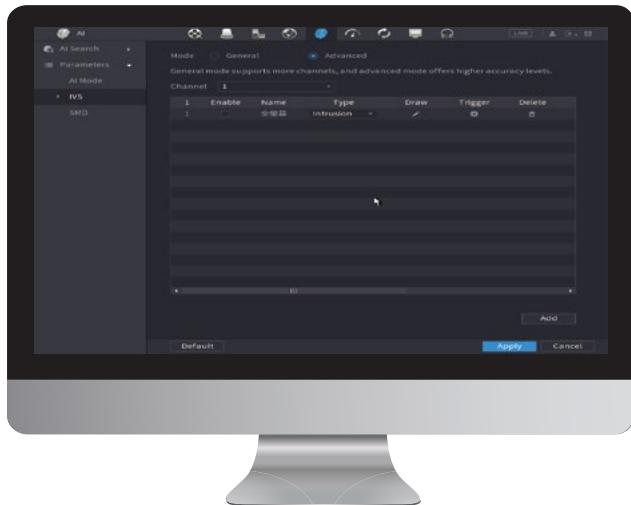

Perimeter Protection

Perimeter Protection system refers to the fortifications built to either keep intruders out or to keep captives contained within the area the boundary surrounds. The Dahua Perimeter Protection is an intelligent analysis based on tripwire and area intrusion. It is powered by AI that focuses on human and vehicle targets, sending alarms only when unwanted movements by human or vehicle have been detected, saving users from unnecessary actions caused by false alarms.

Difference between SMD Plus and Perimeter Protection		
	Perimeter Protection	SMD Plus
Supported Channels	up to 12 channels	up to all channels
Configuration	Draw tripwire or intrusion rules	Enabled by default
Application Scenario	Applicable to specific areas, especially places that need direction	Whole scene by default

Perimeter Protection has been improved to up to 12 channels. The IVS mode can be configured to Advanced Mode or General Mode.

IVS Channels	Advanced Mode	General Mode
5x04/08/16/32-I3	2/2/2/2-ch	4/4/4/8-ch
5x04/08/16/32-4KL-I3	2/2/2/6-ch	4/8/8/12-ch
7x04/08/16-4K-I3	2/2/6	4/8/12

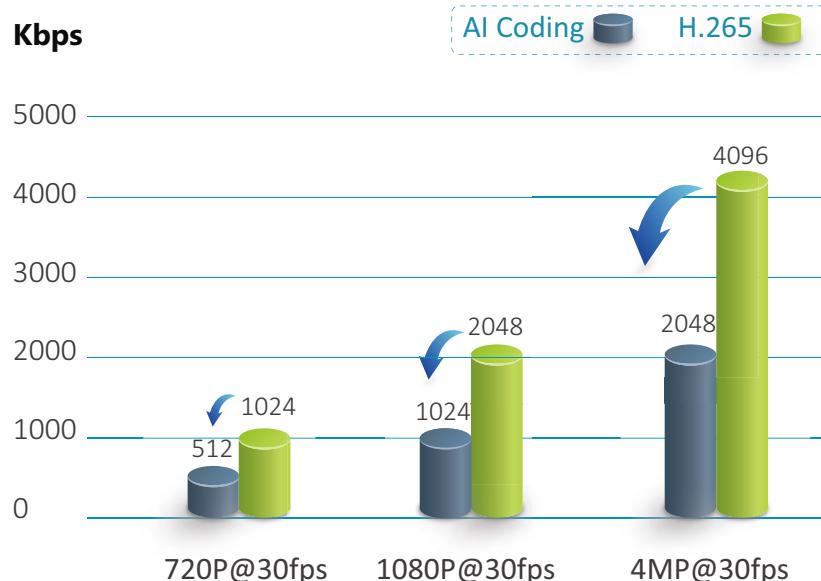

*Performance may vary depending on the device model. For more details, please refer to the locally available products in your area.

AI Coding

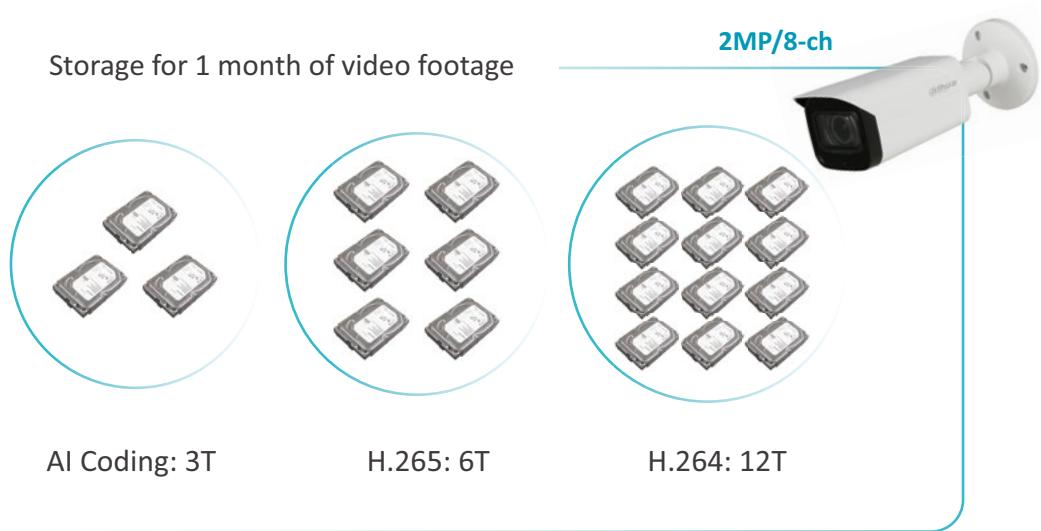

As video moves toward high definition, how to save storage costs while maintaining image quality has become one of the users' concerns. Dahua AI Coding puts emphasis on human and vehicle while encoding, ensuring the target image quality while saving 50% bandwidth and storage costs compared with standard H.265. Through its CBR (Constant Bit Rate) algorithm framework, AI Coding does not lose its decoding compatibility when integrated with third party players or platforms. Furthermore, AI Coding requires fixed bandwidth construction, making it easy to deploy bandwidth and improve bandwidth utilization.

AI Coding function is enabled by default in the newest firmware version.

Saves 50% of bandwidth and storage space!

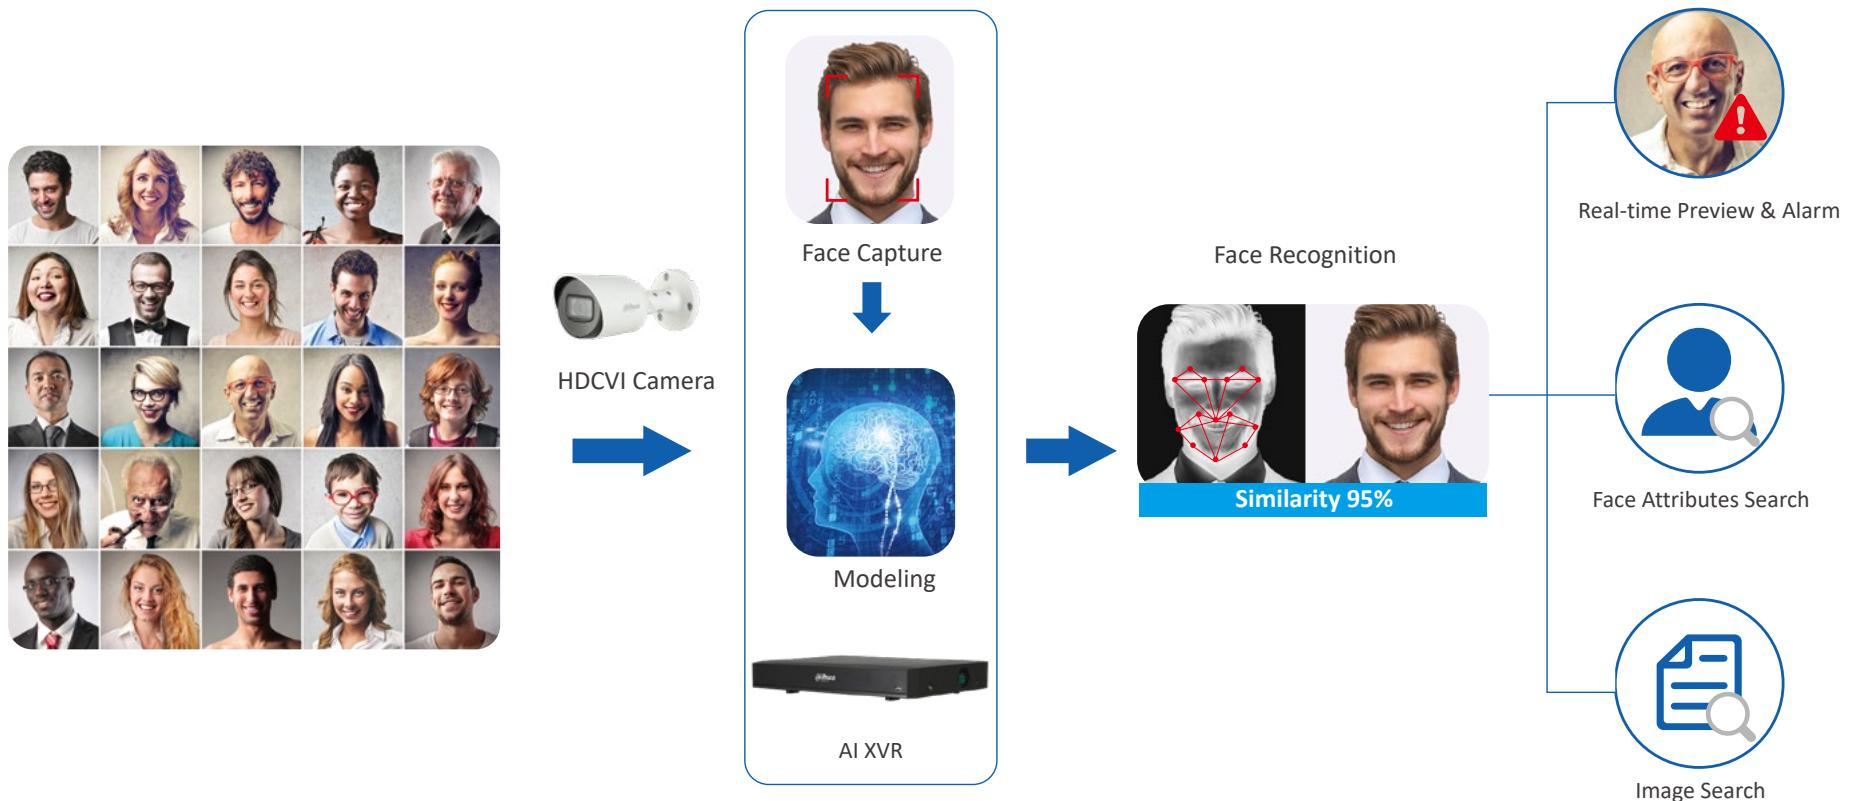

Storage for 1 month of video footage

Face Recognition

By comparing detected face image with a customized face image database, users can gain more business value through VIP recognition, blocklist alarm, stranger alarm, etc.

AI Search enables target searching using attributes or face images, helping users to efficiently and quickly find out when and where a person of interest has appeared in monitored scenes.

PT Camera

HDCVI's new PT camera features a new compact design that supports horizontal and vertical rotation, enabling wider area coverage using a single camera.

The new PT structure was first introduced in the Full-color products. With IP66 protection rating, it can be flexibly used in both indoor or outdoor scenarios.

Turn To A Wider Vision HDCVI Outdoor PT Camera

Pan & Tilt

Easy Installation

Remote Control

S-XVR

The newly released S-XVR has an internal SSD, offering various benefits including friendly cost, low power consumption and less hassle. The Dahua S-XVR conveys the concept of smart, stable and swift, providing customers with a better choice compared with traditional XVR. The S-XVR offers multiple capacity options including 256GB, 512GB (recommended) and 1T, effectively meeting various storage monitoring needs of users and greatly reducing costs.

	Dahua S-XVR (DH-XVR1B04-I)	Normal HDD Solution
Popular Capacity	512G	1T
Storage Time	22 days Meet daily needs	44 days
Cost Efficiency	★★★★★	★★★

*The storage time is for reference only. The actual storage time depends on the default bitrate requirement of each country.

The S-XVR has pre-installed SSD from the Dahua factory, greatly saving installers' working time.

S-XVR

With its electronic circuitry design and the compact size of its SSD, the Dahua S-XVR is more stable than HDD. Dahua SSD uses superior 3D TLC NAND FLASH and self-developed D.L.B.A. (Dynamic Load Balancing Algorithm), which ensures stable operation, excellent product performance and longer service life.

Low Noise

Shockproof

Strong Heat Dissipation

SSD

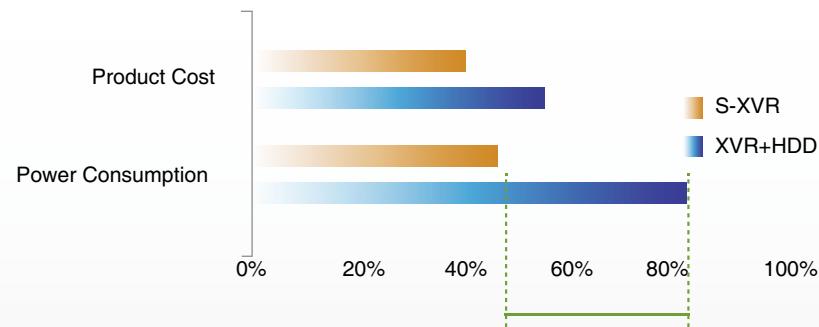

HDD

- Electronic circuitry design and compact size.
- Chief components are controller and memory.

- Main parts are platter and head platters that spin to read/write data.

Compared with HDD solutions, S-XVR has superior power saving advantages. In scenarios that require 24/7 constant operation, S-XVR can save at least 38kWh of power per year, which is equivalent to the power consumption of a 3W LED light for about 3 years.

38 kwh ≈ Using 3W LED light for **3** years

TIOC 2.0

- TIOC (Three-in-One Camera) 2.0 integrates smart dual illuminators, active deterrence and AI into one solution.
- Accurately detects intrusion using Perimeter Protection/SMD Plus and effectively filters out false alarms.
- Actively warns off intruders with red & blue light and siren even before users become aware of the incident.
- Colorful and HD monitoring in warm light mode provides efficient verification with more useful evidence.
- Industry-leading smart dual illuminators technology expands the application scenarios of TIOC 2.0 products.
- Offers protection against red & blue light interference, capturing more clear image details and providing better image quality.

1 Perimeter Protection/SMD Plus identifies intrusion

2 Actively warns off intruders

XVR

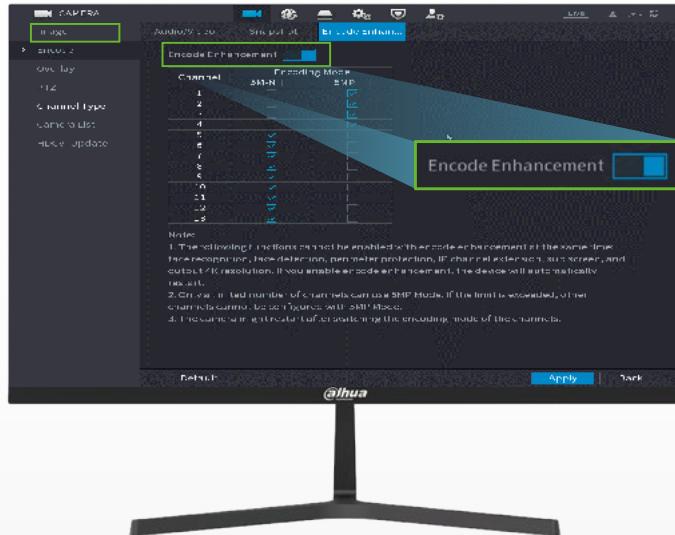

! Alarm over coax

3 Users can verify alarm with video

Real 5MP 2.0

The newly added Real 5MP mode on XVR5000-I3 series and XVR1BH-I series enable 5MP preview and encoding, providing clearer images especially when zooming in.

Flexible Switch

Mode	Preview	Encoding
Real 5MP Mode	PAL: 5MP@12.5fps NTSC: 5MP@10fps	5MP@6fps

Scheduled AI

- AI functions can be set according to different time periods (max. 6 time segments per day).
- Users can set Scheduled AI by week according to actual needs. Reoccurring daily schedules are supported.
- Simplifies the operation and provides more flexible choices for multiple application scenarios.

*Note: The Scheduled AI function is only supported by XVR7000-4K-I3 series and XVR5000-4KL-I3 series. All models support 1 channel.

8:00 am – 9:00 pm

SMD Plus

During day time, the XVR is automatically configured with the SMD Plus function and links with the TiOC 2.0 HDCVI camera. This integration can be used to welcome customers.

9:00 pm – 8:00 am

Perimeter Protection

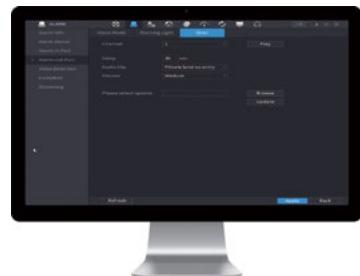

During night time, the XVR is automatically configured with the Perimeter Protection function and links with the TiOC 2.0 HDCVI camera. It can be used for active deterrence.

*Note: The voice-setting function by time can only be used with the TiOC 2.0 camera.

Customized Alarm Ringtone

The TiOC alarm sound can be customized, bringing more convenience and flexibility to end-users.

Two ways to upload customized ringtones:

By Local/Web

By DMSS

Supports WAV/BIN format file (max. 78KB)

Store: "Welcome"

Restricted Area: "No Entry"

Fire Exit: "No Parking"

Construction Site: "Keep Out"

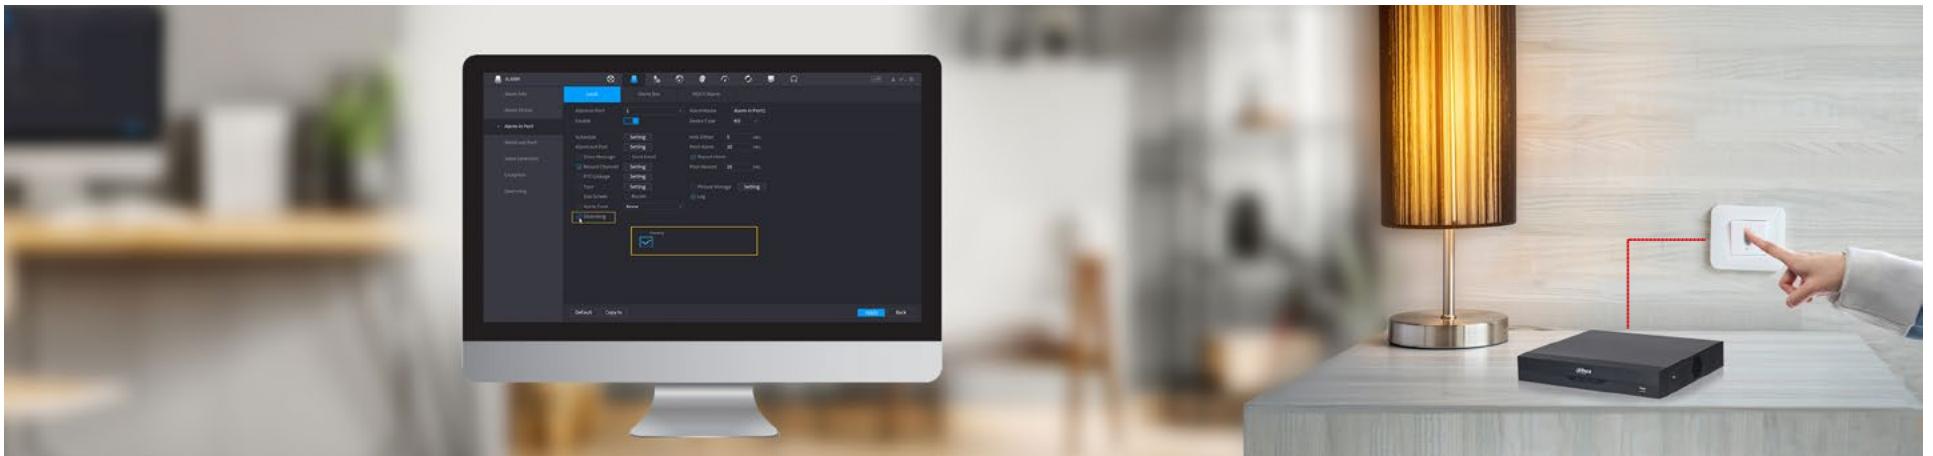

One-tap Arming and Disarming

Users can conveniently switch the arming/disarming function for the siren and warning light via the DMSS app. Notifications to the app or platform can also be disabled to avoid disturbance.

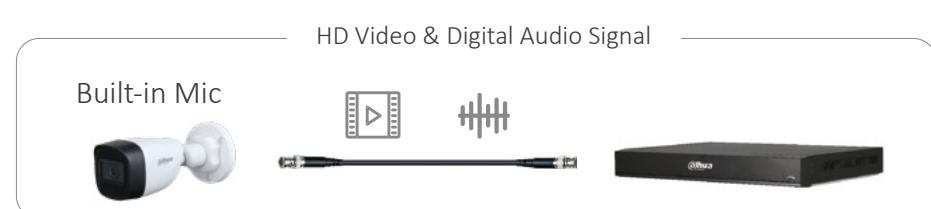

Arming / Disarming Controlled by Local Alarm

Aside from controlling via the XVR user interface or DMSS app, the disarming/arming function can also be controlled by the local alarm of the device, bringing great convenience for end users.

DAC Technology

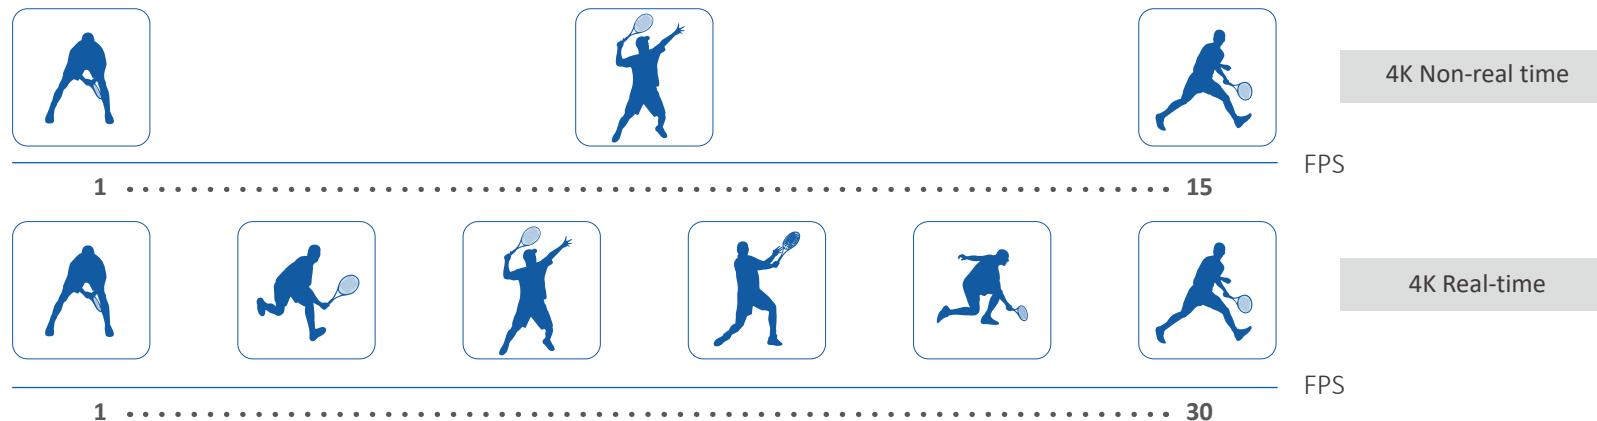

Audio information can bring supplementary evidence in video surveillance. The HDCVI DAC (Digital Audio-over-Coax) technology can provide users with a lossless and real-time auditory experience, and a high-quality video and audio surveillance solution.

- One coaxial cable transmission of audio and video simplifies installation and saves labor costs.
- Lossless and real-time digital audio signal transmission achieves broadcast-level audio quality.
- All XVR models support audio-over-coax, protecting users' investment.

4K Real-time

4K Real-time, one of the core features of the brand-new HDCVI 6.0, is a unique and leading technology in HD-over-Coax market. It restores the monitoring scene with 25/30fps for a better visual experience, and offers superior clarity by capturing even tiny details of the scene.

Real 5MP 16:9

- 5MP 16:9 original image output, achieving undistorted 5MP image performance and super clear details.
- Starlight feature presents clean and bright images even in low light environment.
- 5MP@25fps feature provides more fluent visual experience and abundant details.

Super Adapt

The HDCVI Super Adapt camera recognizes various monitoring environments such as indoor, outdoor or intense lighting, and automatically adjusts the parameters to present optimal images. No manual camera debugging work is required, which greatly saves installation costs.

Without Super Adapt

With Super Adapt

Quick-to-Install

The HDCVI quick-to-install camera adopts aesthetic design with universal joints and quick-to-install pedestal structure, enabling an easy and convenient installation to save labor costs. In addition, all quick-to-install cameras are equipped with built-in mic to collect more useful audio evidence.

HDCVI CAMERAS

Pro Series

Pro Series is a perfect choice for SMB solutions and projects where both high reliability and flexibility are required. All cameras are equipped with Starlight feature, true WDR and 3DNR, and are able to provide clear images and rich details even under tough lighting conditions. Full-color cameras can provide 24/7 vivid color images.

High Definition

Pro Series supports ultra high definition up to 4K, which equals to 4 times 1080P resolution, creating images with impressive clarity and details.

Starlight

Starlight camera can provide bright and clear image even under extreme lowlight environment, allowing more details and longer color image periods to be captured.

WDR (Wide Dynamic Range)

WDR technology optimizes both the bright and dark areas of a scene at the same time to provide usable video in intense contrast lighting conditions.

DAC (Digital Audio-over-Coax)

Audio information is used as supplementary evidence for video surveillance. The DAC technology supports high quality overcoax audio transmission with low noise.

Lite Series

Lite Series is suitable for users who requires high quality monitoring products at a reasonable price. It is cost effective and offers high performance, which makes it an ideal choice for residential and small-medium business applications. This series is equipped with a wide range of technologies such as Full-color and Starlight, providing various solutions for different scenarios.

High Performance

Lite Series adopts advanced in-house ISP and high performance sensor to deliver high quality image with high resolution ranging from 1080P to 4K.

Quick-to-Install

Quick-to-Install structure design allows quick and convenient installation and adjustment, saving time and labor costs.

Full-color

Full-color cameras present 24/7 colored images with clear details to accurately identify people or objects even under low light conditions.

Built-in Mic

Lite Series offers optional models with Built-in Mic, which can collect high quality audio information as supplementary evidence for video surveillance.

Cooper Series

Cooper Series offers simple and highly cost-effective HDCVI solutions. It offers 24/7 reliable monitoring with high-quality image performance, saving both product and labor costs. It is also highly guaranteed by Dahua quality standard.

Reliable Monitoring

Cooper Series provides bright and clear image with rich details day and night. It offers up to 5MP resolution and vari-focal/fixed lens options to fit various scenarios.

Dahua Quality

Cooper Series is designed with complete structure and hardware protection and is fully in line with Dahua's quality assurance standard.

Cost Saving

With real plug & play and compact housing, this series allows easy installation that saves time and labor costs. Its competitive price also saves system deployment for customers.

Active Deterrence Series

Active Deterrence Series provides multi-dimensional system that links video with audio, information and alarm to verify potential risks. Active deterrence camera can actively warn off intruders with light and siren, alert users in real-time with alarm-over-coax, and provide visual verification with HDCVI video.

Active Deterrence

Instead of checking recordings and taking action after an incident, active deterrence camera with embedded light and siren warns off intruders on time, which can help prevent incident from happening and protect lives and properties.

Accurate Alarm

With PIR and motion dual detection, the PIR camera can accurately alarm when human intrusion has been detected, avoiding false alarms and saving storage space for motion-triggered recordings.

Multiple Info Over Coax

In addition to video and audio, multiple data types including alarm, temperature, humidity, etc., can be transmitted over a single coaxial cable.

Panorama Series

Panorama Series offers a wide range of intelligent cameras including fisheye, multi-sensor and dual-lens that cater different scenarios. A single panoramic camera can cover an extremely wide field of view, which makes it suitable for large-scale monitoring applications and greatly simplifies system installation and maintenance.

Multi-sensor Camera

Provides a 180-degree panoramic view which consists of three 1080P single views. The camera has 4 BNCs and outputs one panoramic view and three individual images.

Fisheye Camera

Adopts fisheye lens to provide a 360-degree round view, covering a whole large area. It also offers options for models with 4K/5MP high resolution.

Dual-lens Camera

Monitors two directions with separate cameras, saving installation work. This camera is suitable for monitoring scenes such as corridors, corners and stairs.

Simplicity

Panoramic camera can replace multiple cameras, making installation, adjustment and maintenance easier, and saving product and labor costs for customers.

PoC Series

Power-over-Coax (PoC) transmits both video and electrical power over a single coaxial cable, eliminating separate power supplies for the camera. It further simplifies system deployment with real plug & play, benefiting users with reduced material and installation costs.

Power-over-coax

PoC technology transmits power over the same coaxial cable with video, audio and data.

Long Distance

Dahua PoC transmission distance can reach up to 200 meters for AF cameras and 100 meters for AT cameras.

Cost Saving

HDCVI PoC technology simplifies HDCVI system deployment and enhances power system stability, reducing installation and maintenance costs.

Safe Operation

In case of connection with non-PoC devices or short-circuits in the cable, the PoC system automatically identifies the risk and cuts off power at once, avoiding damage and injuries.

Micro-size Series

Micro-size Series provides various options for scenarios that require inconspicuous cameras. Its compact design and black appearance is environmentally friendly, minimizing interference to on-going activities. It also offers a variety of models with large angle of view for high quality images.

Micro Size Design

Its impressive micro-sized housing has minimum impact to the environment, offering effective concealment to avoid discomfort to people.

Large Angle of View

It adopts lens with larger field of view to monitor wider range and collect more information and details with one camera.

HDCVI PTZ CAMERAS

Pro Series

The Pro Series PTZ is designed to meet high image quality and low-light surveillance requirements with the help of Starlight technology. Various housings and model selections are available to meet the diverse application needs of customers.

Powerful Zoom

It can cover large areas with up to 32x optical zoom capability.

Long IR Range

It offers up to 150m IR range that is suitable for low light environments.

Optimized Image

High quality images with Starlight technology.

Multi-scene Monitoring

Multiple settings that can be preset to expand the camera's coverage.

Lite Series

The Lite Series PTZ offers a cost-effective and high-performance solution that is suitable for a wide range of applications. Its compact design based on Dahua quality standards and assurance enables the products in the entire series to meet customer's requirements.

Mini IR PTZ

Pan, tilt, zoom and IR functions in one compact housing.

Compact Design

Its small compact design can fit in a number of places.

Multi-scene Monitoring

Offers multiple settings that can be preset to expand the camera's coverage.

Powerful Zoom

It can cover large areas with up to 25x optical zoom capability.

HDCVI RECORDERS

S-XVR Series

The newly released S-XVR has an internal SSD, offering various benefits including friendly cost, low power consumption and less hassle. The Dahua S-XVR conveys the concept of smart, stable and swift, providing customers with a better choice compared with traditional XVR.

Cost-saving

The Dahua S-XVR comes with pre-installed SSD devices, saving installation costs and time, satisfying the basic surveillance requirements of users, and making it suitable for the entry-level surveillance market.

Smart

Powered by an AI chip and deep-learning algorithm, AI Coding guarantees more than 11 days of reliable video storage, while SMD Plus reduces false alarms and offers quick search of human/vehicle targets.

Stable

The S-XVR offers low noise, shockproof, and strong heat dissipation. The Dahua SSD is equipped with 3D TLC NAND Flash, which enables a longer product life and ensures continuous 24/7 recording.

Simple

The S-XVR's detachable design allows for easy maintenance and capacity expansion, with 256G, 512G and 1T SSD storage capacities available to satisfy various needs of users while ensuring data security.

WizSense 4K Series

This series can be compatible with 4K HDCVI cameras, and supports 4K Real-time which is a unique and leading technology in HD-over-Coax market. It restores the monitoring scene with 25/30fps for a better visual experience, and offers superior clarity in collecting even tiny details. Also, its adoption of AI significantly saves end-users' time and labor costs and greatly reduces the Total Cost of Ownership (TCO).

SMD Plus

Categorizes the targets detected by motion detection and filters false alarms triggered by non-target objects, realizing accurate alarm for humans and vehicles.

Face Recognition

Supports real-time face comparison, recording of face image metadata, as well as quick location of targets using image and face attribute search.

Perimeter Protection

Offers tripwire and area intrusion detection with people and vehicle classification, achieving highly accurate alarms and reducing unnecessary alarm notifications.

AI Coding

Automatically encodes target's details through recognition of moving human or vehicle, significantly decreasing bandwidth and reducing HDD storage costs.

WizSense 4K Value/5MP Series

HDCVI is not only the first technology to release a 4K version, but also the first one to release 16:9 5MP. It leads the industry again with a new and complete high resolution product series that better fits the needs of various applications and projects with different scales and budgets. Also, its adoption of AI significantly saves end-users' time and labor costs and greatly reduces the Total Cost of Ownership (TCO).

SMD Plus

Categorizes the targets detected by motion detection and filters false alarms triggered by non-target objects, realizing accurate alarm for humans and vehicles.

Face Recognition

Supports real-time face comparison, recording of face image metadata, as well as quick location of targets using image and face attribute search.

Perimeter Protection

Offers tripwire and area intrusion detection with people and vehicle classification, achieving highly accurate alarms and reducing unnecessary alarm notifications.

AI Coding

Automatically encodes target's details through recognition of moving human or vehicle, significantly decreasing bandwidth and reducing HDD storage costs.

WizSense 5MP Value/1080P Series

The WizSense 5MP Value/1080P Series provides an excellent cost/performance solution suitable for various applications. This series offers 5MP HDCVI camera input, providing users with the most cost-effective 5MP solution. In addition, it is also equipped with AI features that bring more value to customers.

SMD Plus

Categorizes the targets detected by motion detection and filters false alarms triggered by non-target objects, realizing accurate alarm for humans and vehicles.

Face Recognition

Supports real-time face comparison, recording of face image metadata, as well as quick location of targets using image and face attribute search.

Perimeter Protection

Offers tripwire and area intrusion detection with people and vehicle classification, achieving highly accurate alarms and reducing unnecessary alarm notifications.

AI Coding

Automatically encodes target's details through recognition of moving human or vehicle, significantly decreasing bandwidth and reducing HDD storage costs.

WizSense 1080N/720P Series

This series is designed for cost-effective and high performance applications. It offers great solutions for users facing budget constraints and requiring both quality and performance. With its AI functions, the XVR is able to provide end users the simplicity of analog system, lower system cost and more application value.

SMD Plus

Categorizes the targets detected by motion detection and filters false alarms triggered by non-target objects, realizing accurate alarm for humans and vehicles.

AI Coding

Automatically encodes target's details through recognition of moving human or vehicle, significantly decreasing bandwidth and reducing HDD storage costs.

DAC (Digital Audio-over-Coax)

Audio information is used as supplementary evidence for video surveillance. The DAC technology supports high quality over-coax audio transmission with low noise.

WizSense Cooper-I Series

The Cooper-I Series offers simple and highly cost-effective HDCVI solutions. It meets the requirements for 24/7 reliable monitoring with high-quality image performance, and saves customers' product and labor costs. It is also guaranteed by Dahua quality standards.

SMD Plus

Categorizes the targets detected by motion detection and filters false alarms triggered by non-target objects, realizing accurate alarm for humans and vehicles.

AI Coding

Automatically encodes target's details through recognition of moving human or vehicle, significantly decreasing bandwidth and reducing HDD storage costs.

Cost Saving

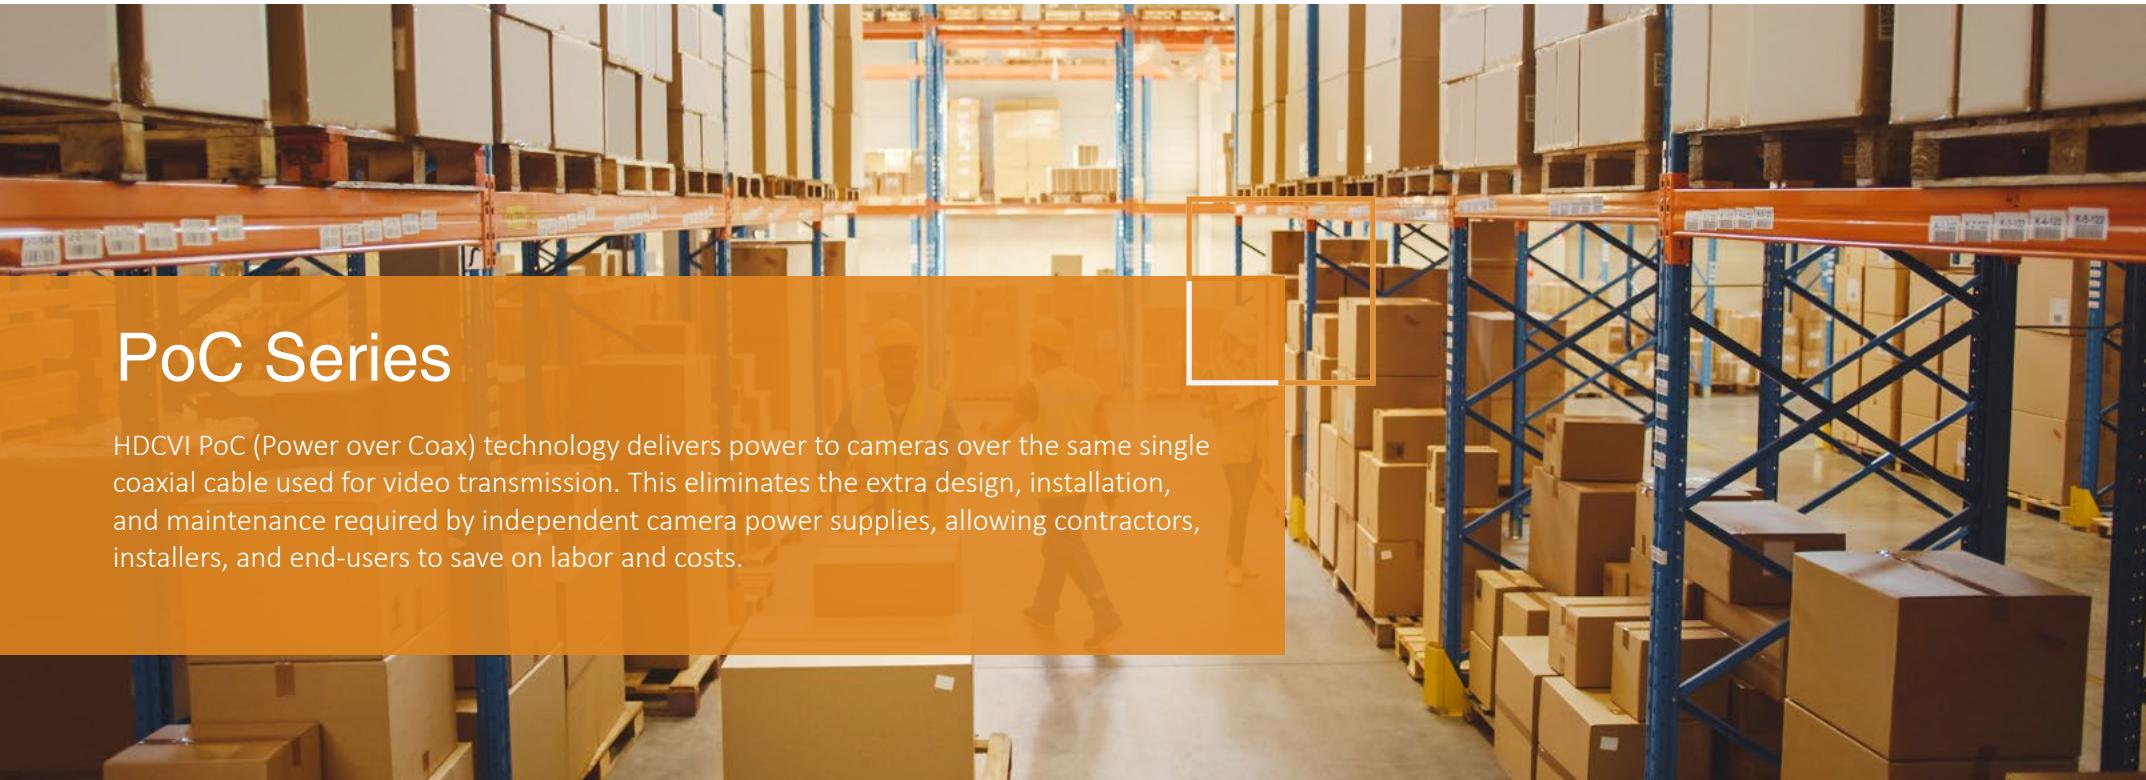

With real plug & play, compact housing designs, and competitive prices, this series allows easy installation and simple system deployment, saving time and labor costs for customers.

PoC Series

HDCVI PoC (Power over Coax) technology delivers power to cameras over the same single coaxial cable used for video transmission. This eliminates the extra design, installation, and maintenance required by independent camera power supplies, allowing contractors, installers, and end-users to save on labor and costs.

High Power Output

XVR-I3 PoC series supports full-channel power supply output and 12W maximum output power for each channel.

Long Transmission Distance

HDCVI technology reaches up to 500m PoC transmission, meeting the requirements for long distance deployment.

Safe Operation

HDCVI PoC technology ensures operational safety: Input Detect / Short Circuit & Overcurrent Protection / Unplugging Protection

AI Features

Equipped with multiple AI functions, including SMD Plus, Perimeter Protection, AI Coding and more.

DISPLAY & CONTROL

Monitor

Adopting industrial panels, Dahua's monitor provides great performance and supports continuous 24/7 operation. In addition, these monitors offer HD or UHD resolution, abundant interfaces, ultra-narrow bezel design, elegant appearance, short response time, cost-effective performance, etc., which are also present in different series.

4K UHD Display

Supports 3840x2160 UHD display and 1.07G color display to present a realistic and vivid image.

Economical Display

The Light series models adopt light plastic housing, which makes it lightweight and cost-effective.

Multiple Interfaces

4K metal monitor supports multiple signals input, such as HDMI, DP, VGA, USB multimedia, Audio, RS232, allowing it to adapt to various scenarios.

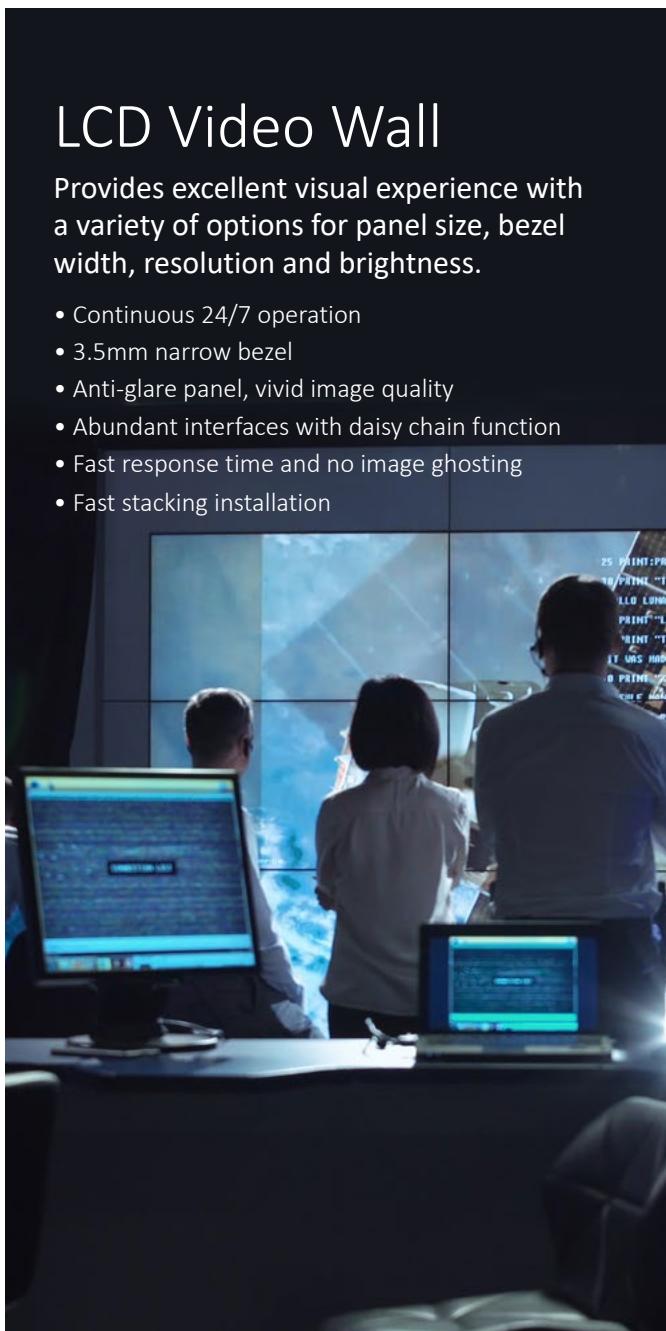

Industrial Design

The monitor adopts industrial panel which supports 24/7 continuous operation, making it more suitable for security applications.

Keyboard

A network keyboard is a control device with joystick that can realize convenient PTZ operation, video wall control, etc.

- Powerful control capability
- Easy connection
- Flexible joystick
- Multiple combination key

Keyboard

Model	NKB1000-E	NKB5200
Appearance		
Control Mode(s)	Direct Mode, Network Mode, USB Mode	Direct Mode, Network Mode
Control Interface	1 RJ-45 port (100/1000M), RS232, RS485, RS422 (reserved), USB	1 RJ-45 port (100/1000M), Wi-Fi, RS485
DVR/NVR Protocol	DH2	DH2
Dome Protocol	DH-SD1/PELCO-D/PELCO-P	DH-SD1/PELCO-D/PELCO-P
Max. Users	64 (all can manage up to 2,048 unit devices via network)	32 (all can manage up to 5,000 channels via network)
Screen	Monochrome LCD screen (128×64)	10.1" TFT LCD touch screen (1280×800)
Local Split Display Mode	--	1/4/9/16
Video Output	--	1CH HDMI/VGA
Local Decoding	--	1CH@4K/4CH@1080P
Intercom	--	1 Pair (reserved)
Joystick	3-axis (zoom, focus, iris)	4-axis (zoom, focus, iris)
Main Processor	Industrial embedded microprocessor	Six-core processor
Operating System	Embedded LINUX	Android
USB	1 USB2.0	1 USB3.0, 2 USB2.0
Power	DC12V, 1A	DC12V, 4A;POE
Highlights	Supports multi-user access control; Controls DVR, NVR, EVS, decoder, matrix; Works with SmartPSS or DSSClient via USB port	
	All touch screen, 4K & H.265 decoding, video roaming, video local display, scheme preset, control NVR, DVR, EVS, decoder, matrix, platform, local visible control	

ACCESSORIES

Accessories

Accessory products offer a series of supporting equipment for CCTV monitoring devices promoted by Dahua, which enhances product integrity and user experience, and supplements the insufficiencies of traditional products and solutions.

Camera Mount

Provides a series of solutions for the installation of cameras.

Power Supply

Provides different power supply type for devices with different specifications.

Cabling

Provides different cable products to meet the transmission requirements of different equipment.

Audio

Collects live sound signals for the camera.

ACCESSORIES

Camera Testers

It allows easier testing of cameras that only requires a single person to operate, saving significant amount of time and labor costs.

- Camera video tester
- Small tools: DMM/Wifi test/OPM/Data monitor
- Cable tester: TDR/ Analog video generator
- Power supply: PoE+/ DC12V2A/ USB5V2A output

HDCVI Accessories

A balun can transmit analog signals through the network cable, which greatly reduces transmission costs. It can also realize power supply transmission.

- Real-time transmission over UTP CAT5E/6 cable
- With female BNC connector, and pluggable screw terminal connections
- Excellent anti-thunder, anti-static and anti-interference capabilities
- Compatible format: HDCVI/TVI/AHD/CVBS

Power Supply

Safe and reliable power supply accessories for our products.

- DC power adapter: Wide temperature operation from -30°C~+70°C and lightning protection up to 4KV
- Distributed power: Offers wall mount installation, providing convenient power supply to different devices
- Switch power: High quality, reliable, widely used, and flexible
- UPS: Temporary power discharge equipment between utility and equipment

Weight	4.25kg (9.37lb)	10.4kg (22.93lb)

Cables

Network/Coaxial cables with higher quality and higher cost-performance ratio.

- 305m CAT5e/CAT6 network cables and RG59 coaxial cables meet all user requirements
- High-purity and oxygen-free copper conductor material
- Customized PVC sheath, CE CPR Eca or ANSI UL CM flame retardant class certified

Cabinets

Cabinets provide protection and stable working environment for storage devices. It also serves as shield against electromagnetic interference.

- Aesthetic design
- Standard 19" rack
- Supports wall mount and plane mount
- Cable entry on the top cover and bottom panel
- The four sides of the cabinet can be opened

Cabinets

Pickups

Choose from a variety of pickup products to effectively capture live sounds.

- High sensitivity microphone
- Intelligent noise reduction
- Smart audio crack protection
- Wide dynamic range processing technology
- Automatic supplement function

Pickups

Model	HAP100	HAP201	HAP301
Appearance			
Scope	5-40m ²	1-150m ²	1-150m ²
Sensitivity	-40dB	-38 dB	-38 dB
Frequency Response	20Hz~20kHz	20 Hz~20 kHz	20 Hz~20 kHz
Directional Characteristic	Omni-directional	Omni-directional	Omni-directional
SNR	70dB	85 dB	85 dB

VIDEO MANAGEMENT SOFTWARE

DMSS

Digital Mobile Surveillance System

Monitor anything using your smartphone or tablet anytime, anywhere.

DMSS	Digital Mobile Surveillance System	Security At Your Fingertips
Devices	Supported Devices	XVR, NVR, IPC, PTZ, VTO, DoorBell, Access Controller, Alarm Hub, Accessory (PIR, siren, door detector, etc.)
	Max. Devices Recommended to Add	1024
	Add Device Method	IP/Domain, SN/Scan, LAN Search, Wired, Wireless (smartconfig, soft AP)
	Features	Live and Playback, Alarm push, Device Sharing, Export Device, Time Zone, Cloud Update, Remote Configuration
Video	Compression Format	H.265 / H.264 / MPEG-4 / JPEG
	Display Resolution	Up to 1920-1080
Live	Split Live View	Display in 1, 4, 9, 16 views
	Features	Snapshot, Video Recording, Playback, Play/Pause, Mute/Unmute, Orientation/Landscape, Video Stream, Two-way Audio, Favorite, PTZ Control, White Light/Buzzer, Fisheye, Wiper, Alarm Message, Unlock the Door, etc.
Playback	Video Playback Duration	24h
	Features	Snapshot, Video Recording, Play/Pause, Mute/Unmute, Orientation/Landscape, Clip, Play slowly/Play fast, Timebar, Frame-in-frame
Alarm Push Notifications	Alarm Type	Motion Detection, SMD, Instruction Alarm, Tripwire Alarm, Scene Changing, Video Mask, Disk Alarm (no disk, low space, disk error), Object Detection, Face Alarm, IPC Offline, License Plate Recognition, Missing Object, Temperature Alarm, Fast Moving, Defocus, Local Alarm, Crowd Alarm, Network Alarm, Fire Alarm, Smoking Alarm, Phone Call, etc.
	Push Type	Alarm Video, Preview, Message, Video Call

DORI Distance (D/O/R/I)

Find the Optimal Camera for Your Individual Surveillance Needs

The DORI distance is a “general proximity” of distance that can easily pinpoint the right camera based on your needs and requirements. The DORI distance is calculated based on sensor specification and lab test result according to EN 62676-4 which defines the criteria for Detect, Observe, Recognize and Identify respectively.

- █ Detect: 25ppm
- █ Observe: 63ppm
- █ Recognize: 125ppm
- █ Identify: 250ppm
